

## Directions to gain Pool Access

To put your information in for pool access, you will need to go to the HOA's website at:

<https://hillsteadhoa.com/homepage.aspx>

Once you have signed into the site, go to "Homeowner" then to "Online Forms" then "Pool Access", and click on that link.

This will take you to the form to fill out to get access to the pool. You can put up to 4 people from your address into the system for pool access. As this will be done from your phone, you don't need to keep track of a card to gain access.

Just put in the name, age, and email for each person to have access.

Each of them will get an email, once the system is programed with their information, from the system using email [no-reply@accounts.pdk.io](mailto:no-reply@accounts.pdk.io).

They will need to download the program PDK.IO. The email will have a code, in bullet #5, simply put that code into the program, and that will link the app to your account.

Then, when approaching the pool, you will need to open the app, and it will let you in.

If you have any questions, or have problems with the system, please let me know.
